

Quality, Efficiency & Performance

A higher standard for Commercial HVAC

Crawford was founded as a company focused on heating, ventilation, and air conditioning solutions. In the 1950's, these projects were largely residential. By the 1970's, the company expanded HVAC operations to include commercial and industrial applications. In the years since, we've worked to establish a broad range of expertise in the commercial arena.

Crawford installed and maintained systems can be found throughout the region in schools, factories and hospitals. Reliable performance, preventative maintenance and expert, responsive service have become the hallmarks of the Crawford name.

From skilled specification through expert deployment

We have a staff of full time estimators who work to specify, calculate and configure according to the specific needs of each project. Each of them "owns" the project, monitoring progress along the way to ensure that everything goes smoothly.

A team that includes the estimator, shop and field employees is assigned to each project and they stay with the project from beginning to end. This guarantees that every customer gets a team effort, complete with pride of performance right through to the end.

Fast and professional service

When your emergency calls for a quick response, Crawford's 24-hour service is here to help. With over 150-years of combined field experience, our team is ready and able to help clients when they need us most!

Customized HVAC Maintenance Plans

Preventive maintenance is the best way to avoid an emergency. Crawford can design a customized plan designed to keep your systems performing at peak efficiency. You'll miss out on the drama – and damage – that an equipment failure can cause. You'll also save precious energy dollars, optimize occupant comfort and increase equipment life.
