

Case Study

KONE Tree Project

Crawford Division:

Welded Fabrication

Client:

KONE

Moline, IL

Challenge:

Help secure 43-foot tree to rooftop of multi-story building along river

Solution:

Fabricate and install structure support for Christmas tree

Project Summary:

Crawford Company assisted with the KONE Christmas Tree project. The company was brought in to design and fabricate the support structure for the 43-foot Christmas Tree. Crawford's dedicated team worked, around the clock, to assist with last-minute adjustments during the installation process. The support stand weighed a total of 2500 pounds (20' x 20' square). The holiday tradition began at the former KONE Tower and has now continued at KONE's new building at Bass Street Landing.
