

## Case Study

### The Landing

**Crawford Division:**  
Fabrication

**Client:**  
Schwiebert Riverfront Park  
Rock Island, IL

#### Project Summary:

Crawford Company's Fabrication Division played an instrumental role in creating the architectural features you will find at The Landing at Schwiebert Riverfront Park. These features include the wrap around hand rail, decorative gates, signs, and gazebo. Crawford Company designed and fabricated the fence panels as well.

Several areas of the Fabrication Division were utilized to create these products including laser cutting, welding, painting and galvanizing, and assembly. Crawford Company was responsible for the site installation of these products. From design to installation The Landing project took approximately one year to complete.
