

## Case Study

### Americold Treated Water Tank

**Crawford Division:**

Plumbing

**Client:**

Americold  
Bettendorf, IA

**Challenge:**

Remove, replace treated water tank

**Solution:**

Partner with Monoxivent's Corrosion Composites to fabricate, install, and provide plumbing/piping for job

**Project Summary:**

Americold, Bettendorf, IA, sought out Crawford Company and Monoxivent to replace a failing steel tank with a corrosion resistant fiberglass tank. The tank is part of the ammonia refrigeration process that serves the warehouse. The tank reclaims treated water for the process.

Crawford Company removed the existing tank, installed the FRP tank, provided process piping, and associated plumbing work.

Monoxivent is an affiliate of Crawford Company and its' Corrosion Composites brand goes to market in industrial segments throughout the USA and Canada.
