

Case Study

Pleasant View School

Crawford Division:

Mechanical

Client:

Pleasant View School

Challenge:

Existing/older water heater lacked efficiency and was in line for replacement

Solution:

Installation of four new 95% high efficiency Navien condensing tankless water heaters with modular cascading operation

Project Summary:

Crawford Company completed the hot water heater renovation at Pleasant View School. The project included replacement of existing system, installation of four Navien tankless water heaters, and piping. The net result will allow the school to have more energy efficient water consumption.
