

Case Study

Residential Handrail Project

Crawford Division:

Custom Architectural Products

Client:

Quad City Area Home Builder

Challenge:

Provide aesthetically pleasing handrail to accent area home

Solution:

Crawford provided a functional design that complimented the exterior home design

Project Summary:

Crawford Co. met with an area builder to design, fabricate, and install a custom handrail at a riverfront home. The handrail is constructed of mild steel. Crawford Company hand fabricated the entire assembly, before it underwent a four-step powder coating process. The goal of the project was to create an aesthetically pleasing, yet functional, handrail to accent the stone work at the residence.
