

Case Study

Sewer Line

Crawford Division:

Plumbing

Client:

Quad City Area Homeowner

Challenge: Investigate cause of backed up sewer line in front yard; immediately address problem

Solution: Crawford replaced collapsed sewer line

Project Summary:

Crawford Company was contacted by a homeowner with a sewer line backing up in their front yard. Crawford promptly investigated the cause of the problem; discovering that the sewer line was old and collapsed from the home to the street. The recommendation was to immediately replace the sewer line.

Crawford mobilized with all the needed equipment and material to resolve the problem. Journeyman Brock Adams and Journeyman's Assistant Logan Wodsworth installed a new sewer line in one day. The homeowner was back up and running with very little service interruption.
