

## Case Study

### Wells Fargo Bank Building

**Crawford Division:**

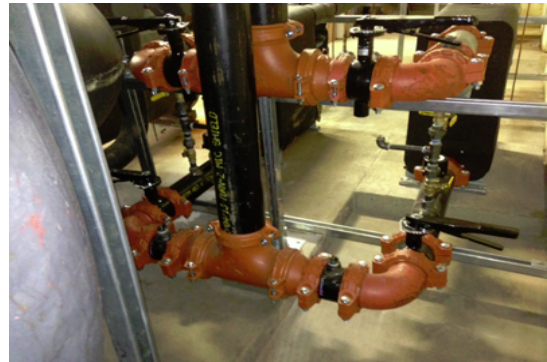

Mechanical

**Client:**

Wells Fargo Bank Building

**Challenge:**

Upgrade water cooled chilled water system to air cooled chillers

**Solution:**

Provide two 120-ton air cooled Trane chillers, along with associated refrigerant piping and remote evaporator bundles

**Project Summary:**

Crawford Company provided two 120-ton air cooled Trane Chillers, along with associated refrigerant piping and remote evaporator bundles. The upgrade was needed due to outdated equipment and high maintenance costs. The Crawford solution allows for a more effective and efficient operation. The upgrade will save on maintenance costs and utilities, while providing a more user-friendly operation.
